1. Cut out each OTP (below) separately, place them in an envelope in a secure location
2. *After using a OTP, destroy it completely, even if there are unused portions. An OTP must NEVER be used twice.
3. Use the above Key to convert plain text and to decrypt messages

*The One Time Pads below are for training and familiarization purposes only. If you wish to keep them, instead of destroying them, for future practice exercises between you and others in your group, that would be acceptable. Just remember that they have been sent to you by open email, and used (and known) by many other people.

The 'Tree' Series OTPs cannot be considered secure for real-world situations, and should be considered 'compromised' for any purpose other than training.
